Response to Amendment

The amendments filed after the final rejection have not been entered. The added/deleted limitations within the amendments of claims 1, 12, 25 and 28 raise new issue that would require a further search (an example of this new subject matter is disclosed in claim 12, where the applicant now specifies that a local network is configured to..., and a message is received from a local network, other examples exist but are not addressed).

Response to Arguments

In response to the applicants arguments, the examiner asserts that these arguments are based on the amended claims as it pertains to claims 1, 12, 25 and 28, however these amendments have not been entered as indicated above, thus these arguments are moot.
